ANTICA  
OFFICINA DEL  
FARMACISTA:  
DR. VRANJES

Antica Officina del Farmacista was created in Florence in 1983, out of the passion of Dr. Paolo Vranjes, a pharmacist, chemist and cosmetologist.

Dr. Vranjes creates exclusive Scented Decors and Ambient Scents, combining the ancient tradition of distillation of natural oil essences and the research of elegance, from the packaging design to the bottles' distinctive shape.

At the core of the formulation of the essences is the observation that some scents remind us happy moments from the past or familiar places. These are also the concepts at the basis of olfactory memory and aromacology, a discipline which studies the beneficial effects of essences on our mental and emotional well-being.

Relaxing like tender lavender, energizing like a Sicilian lemon, spiced like pungent cinnamon: whatever its properties, the essence is the soul of each of Dr. Vranjes' creations.

**Choose** among a wide range of items and 30 different available scents, **find** the fragrance which best epitomize your company's philosophy and **make** an exclusive gift to your business partners or your own managers and employees.
